

dbGrid™ Acoustic Ceiling Panel Series

PRODUCT OVERVIEW

Dbsorb BelowGrid™ range of high-performance acoustic ceiling panels help to create a modern, open look, and improve the audible clarity in large open spaces.

OpenGrid™ is a light-weight, high-performing, and attractive alternative to metal ceilings.

Designed and manufactured here in New Zealand, OpenGrid™ visually masks ceiling plenum spaces, whilst allowing for open air circulation and above grid lighting.

Additional baffles can be backloaded or provided pre-assembled with the OpenGrid™ for aesthetic contrast, a visual barrier between spaces, and enhanced sound absorption properties.

Available either in standard colours and sizes, or with custom colour and size combination.

BENEFITS

Precise Installation
Dbsorb OpenGrid™ series comes in three standard panel sizes to perfectly fit standard ceiling grids.

Better Spaces
Improved acoustics: audibly reduces reverberation time.

Visual Impact: Three standard grid sizes, and alternative design finish options, and a variety of available material colours offering up to 80% light reflectance.

Future Proofing
Ensures 100% plenum space access.

Durable panel construction with high impact resistance, easy to maintain or replace.

APPLICATIONS

Ceiling:
Corporate Interiors, Showrooms, Speciality Retail, Foyers & Lift Lobbies,
Retro-fit to existing grid or for new builds.
