# WoodScape™ Screens

COMO Building Products **WoodScape™ Screens** are a natural wood fibre product saturated in an organic non-toxic dye, resulting in an even continuous colour core throughout. **WoodScape™ Screens** are moisture resistant, easily machinable that require no additional finishing or treatment to the cut edge. Our decorative pattern range provide endless interior applications and are perfect for joinery, screens or custom designed shapes and panels.

## Product specifications

### Size

2400mm x 1200mm  
Some patterns are scalable up to 2400mm x 1200mm. Check with your local COMO representative.

### Thickness

- 9mm & 18mm
- 12mm is also available in black only

### Solid colour – coloured core

The pigment is integrated directly into its wood fibres, which creates a consistent colour throughout the board.

### Colour stability UV resistant

Natural and artificial light resistant retaining the brilliant colours longer.

### Moisture resistant MR MDF

Moisture resistant with a special water-resistant resin added to the panel. MR MDF panels can be used in areas subject to humidity. Note: A final coating is still required to protect the surface.

### Available coatings

Single or double sided water based satin (30% gloss) or matt (10% gloss) finishes

### Non-toxic E0 rated

COMO WoodScape™ Screens have an extremely low formaldehyde level for low VOC interiors.

### Sustainable

FSC® Certified

### Fire Rating

Group 3

### Disclaimer

Each fibre in COMO WoodScape™ Screens is individually dyed. Variations in colour tone or hue may occur in the production process as individual wood fibres will absorb varying amounts of dye. Some colours are more susceptible to variations in colour tone. Panels should be selected from the same batch of the same thickness. To ensure a suitable colour toning is achieved care should be taken when blending different thicknesses on a project. We recommend all surfaces have a suitable coating system to protect them against marking and provide optimum performance. All orders should be purchased for one consignment. Panel colour is to be checked and blended prior to installation. Discuss your WoodScape™ Screens project scope and requirements with COMO to ensure the best outcome.
