

PROMASEAL® Bulkhead Sealer System

Installation guide

www.promat.com

PROMASEAL® Bulkhead Sealer System

Made using high density mineral wool that is protected with a robust ablative coating to both faces.

PROMASEAL® Bulkhead Sealer batts are a simple and economical way to fire rate voids and when combined with Promat's many other fire stopping systems can protect a wide range of penetration types and sizes.

Properties

- → Approved to AS1530.4(2014) and AS4072.1
- → Manufactured to ISO2001:2008
- → Size: 1200 x 600 x 50mm
- → Coating: White Ablative
- → Density: > 160kg/m³
- → Packaging: Individual wrapped in Promat branded plastic film
- → Acoustics: Rw (Ctr) : 29 (-3)
- → FRL: up to -/180/180

Benefits

- → Economical
- → Easy install
- \rightarrow Up to 3 hours fire rating
- → Floor and wall penetrations

Penetrations Approved

- → uPVC
- → HDPE
- → PVC Conduits
- → Metal pipes lagged and bare
- → PEX
- → Cables (electrical/telco/optical)
- → Cable Trunking

Approved substrates

- → Concrete Slabs
- → Plasterboard walls
- → Speedpanel
- → KOROK
- → Hebel/AAC
- → Masonry

Please refer to the relevant assessment report for installation specifics

TESTED WITH

- PROMASEAL®-A Acrylic (405932)
- 2. PROMASEAL® Retrofit collars (78257-78256)
- PROMASEAL[®] Wall Collars (78271-78269)
- PROMASEAL[®] Conduit Collars (78230)
- 5. PROMASEAL® Supawrap (4070360)
- 6. PROMASHEILD®

Approved Opening Sizes

Walls:

Method 1

Min. 116mm Plasterboard (2 x 13mm each face), Concrete, Masonry, AAC . 2 layers installed within opening

- \rightarrow Up to 600mm (H) x Up to 1500mm (W) or
- \rightarrow Up to 1000mm (H) x any width up 1m² or
- Up to 500mm (H) x any length \rightarrow

Method 2

Min. 116mm Plasterboard (2 x 13mm each face), Concrete, Masonry or Min. 75mm AAC min. One Layer installed on each face of wall

Up to 550mm (H) x 450mm (W) \rightarrow

Method 3

Min. 75mm AAC. Min 78mm Speedpanel Concrete, Masonry. One Layer on face. One Layer inside opening

Up to 550mm (H) x 450mm (W)

Method 4:

Min. 90mm Plasterboard (1 x 13mm each face), Masonry, Concrete. One Layer inside opening

Up to 600mm (H) x Up to 1200mm (W) 4

Method 5

Min. 116mm Plasterboard (1 x 13mm each face), Masonry or Concrete One Layer installed on each face of wall

Up to 550mm (H) x 450mm (W)

Approved Opening Sizes

Floors

Method 1

Min. 120mm Concrete. 2 layers installed within opening

- \rightarrow Up to 800mm (W) x Up to 1500mm (L) with angles or
- \rightarrow Up to 500mm (W) x Up to 1000mm (L) no angles or
- \rightarrow Up to 600mm (W) x any length. Angles at 600mm centres
- \rightarrow Up to 300mm (W) x any length. No additional supports

Method 2

Min. 120mm Concrete. 1 layer installed within opening, 1 layer on top of slab (100mm overlap)

- \rightarrow Up to 800mm (W) x Up to 1500mm (L) with angles or
- \rightarrow Up to 500mm (W) x Up to 1000mm (L) no angles or
- \rightarrow Up to 600mm (W) x any length. Angles at 600mm centres
- \rightarrow Up to 300mm (W) x any length. No additional supports

Method 3

Min. 120mm Concrete. 2 layers on top of slab (100mm overlap)

- → Up to 800mm (W) x Up to 1500mm (L)
- \rightarrow Up to 600mm (W) x any length.

Installation Method

Please see safety data sheet (SDS) for appropriate personal protection equipment (PPE).

1. Measure opening and cut PROMASEAL® Bulkhead Batt to suit the opening and services.

3. Assemble batt into the opening. Noting any additional support requirements as listed in the relevant report.

2. Apply PROMASEAL®-A Acrylic Sealant to the cut surface and the mating substrate.

4. Joints between layers should be staggered so that no straight through gaps occur in the filed of the batt. Do not have cross junctions of butt joints in a single layer.

5. Fire stop penetrations in accordance with the relevant report.

6. Apply sticker to finished penetration.
