EzyJamb EZC Door Jamb are available with the following hardware options.

Door Type	Herline, Liff and Concealed Hinges	Stainless Steel Latchplate	Plastic Latch Insert	1020mm Latchplate Punching
Standard Doors 2040mm high or less	2	1	1	1
Standard Doors 2040mm-2340mm high	3	1	1	1
Double Doors 2040mm high or less	4			
Double Doors 2040mm-2340mm	6			

EzyJamb EZC Australian Door Handing

Floor to Ceiling Doors

Floor to ceiling doors require no header jamb as the door extends to the total height of the wall, when framing for this type of application allow the ceiling framing and plasterboard to carry on through to the adjacent space.

Pricing & Quotes

All prices for EzyJamb, accessories and associated processes do not include GST or freight charges unless expressly noted in writing. Always confirm pricing prior to order.

Custom Door Sizes

Custom size EzyJamb are available on request. Longer lead times and additional charges may apply. Custom latch plate punching available on request.

Jamb Height

Manufactured jambs are always cut 25mm longer than the specified door height - to allow for floor coverings.

Latch Plate Punching

Latch plate punching is standard at 1020mm from base of jamb. All latch plate punching dimensions are measured from the base of jamb up.

Availability

Lead times apply to all EzyJamb orders. Typical lead time from date of order to delivery is five (5) working days. For QuickShip orders, please refer to page 23.

Installation Detail

Step 1

Ensure that the stud opening is square and level and measures:

Stud opening sizes for Herline /Liftoff Hinges

Width Single Door	Door Width +15mm Maximum
Width Double Door	Door Width +18mm Maximum
Height	Door Height +33mm (+8mm at header, +25mm at floor level)*

Stud opening sizes for RY-45 Concealed Hinges

Width Single Door	Door Width +40mm Maximum
Width Double Door	Door Width +63mm Maximum
Height	Door Height +33mm (+8mm at header, +25mm at floor level)*

*depending on floor clearance. Check with the Project Manager on site to confirm floor coverings.

i It is strongly recommended that a timber stud or a 0.75 BMT metal stud is used on both sides of the opening.

Step 2

Fasten hinge side first, making sure jamb is level and as tight against stud opening as possible. Then screw at 200mm centres up stile, screwing back through plasterboard into stud work See *Detail 'B'* and *'C'*.

Double screw all ends as per *Detail D*. and beside hinge position - both above and below hinge as *Detail E*.

Step 3

Fit the final vertical section (strike jamb) into the head section joining clip. Ensure that the spacing between the two vertical sections are spaced evenly at the required distance.

ie: 820mm door, opening is 825mm
 720mm door, opening is 725mm

Step 4

Ensure the perforated side strips sit flat against the plasterboard to enable the jamb sections to be easily set into the wall surface. **All the corners must be taped and plastered/jointed in as Detail F.** Finish the jamb with approved plaster/jointing compound.

Hang the door in position leaving about 3mm clearance from the top and the hinged side using the EzyJamb Standard or concealed Hinges. Surface mount the striker plate into position to align with the latch plate punching.

Step 2A | Head Installation

Head joiners as inserted in jamb.

Locate head into joiner and make flush with jamb so the head joiner is not seen.

Remove the remaining head joiner out of the strike jamb into the end of the head (as shown) to receive the strike jamb.

Completed Installation

The completed jamb is flush finished and can be painted in with the whole wall area to fully conceal any fixing, achieving simple clean lines around the door face.

Right

RocYork Lift-off Hinges

RocYork Lift-off hinges are ideal for doors that require a service gap, such as bathrooms and toilets. In compliance with NCC (BCA) 2011 F2.5 (b), EzyJamb doors with Lift-off hinges can be quickly lifted and removed without the need for unscrewing the hinge, saving time in an emergency.

When ordering, please be aware that RocYork Lift-off hinges are available as left or right handed. The drawings below illustrate what the left and right hinges look like.

EzyJamb Liftoff Channel

The EzyJamb Lift-off Channel complements the RocYork Lift-off hinges by creating a deep rebate that conceals the service gap above the door, but still allows for compliance with BCA requirements.

The special EzyJamb Lift-off Channel fits over the header stop and is affixed with construction adhesive, for easy installation.

EzyJamb Classic Adjust EZC is available in a variety of sizes to suit your requirements. Below are the components of the EzyJamb Classic Adjust EZC system.

Finished Wall Tolerances - Section A

AccessDor

Smooth Transitions From Wall to Access Panel

AccessDor® cleverly conceals the appearance of the access panel by creating a flush finish to the plasterboard and eliminating the need for trims and architraves around the door. With only a 3mm reveal between the door and plasterboard, AccessDor blends seamlessly into the wall or ceiling, resulting in a frameless access panel.

Available in standard sizes or bespoke solutions, AccessDor can be custom made to fit your specifications. The EZ Concept range of AccessDor panels also includes a range of fire rated options and various latch choices to suit your security requirements, including screwdriver cam latch, key operated cam latch or touch latch.

AccessDor Features

Budget Lock

Access panels available with budget lock. Does not require any special tools to open.

Key Lock

Access panels available with a key lock for added security. A number of panels can be keyed alike.

Touch Latch

Access panels available with a Touch Latch, providing a clean finish. Simply press the door to open.

Finishing

EzyPelmet

Fast, Economical Recessed Window Pelmet Systems

Adding a new dimension to the internal perimeter of square-set interiors, EzyPelmet® is a two-piece steel pelmet system that makes window blinds disappear, cleverly conceals feature lighting and opens vast panoramas before your eyes. EzyPelmet offers a simple and discrete transition between the interior ceiling and external windows, curtain wall facades or the building structure.

The two-piece, pre-finished steel construction of EzyPelmet makes installation simple, compared to traditional pelmet systems that require time consuming construction methods.

EzyPelmet Features

- Contemporary, clearview design.
- Completely concealed fixings.
- Install from below after ceiling.
- Flush-finish edge for square-set interiors.
- Does not require fixing from the top.
- Fastest method for creating window pelmets.
- Suitable for blinds, curtain, lights & more.

EzyCap

The Strong and Versatile Stop End

Capping of internal balustrades, window openings and internal partition wall ends are all made easy using EzyCap®. Using a slip-fit fixing method, EzyCap simply slides onto the end of the plasterboard and doesn't require preparation to paint in with the rest of the wall, significantly reducing time and effort during installation and presenting a crisp finished wall end.

As the strong and versatile alternative for stop ends, EzyCap is an economical way to cap wall ends and prevent damage from wear and tear in high traffic areas over time, keeping masterpiece designs intact for years to come.

Custom Shadowline

Clean Contemporary Lines

Modern interior design is characterised by clean lines and flush finishes. Shadowline sections provide simple yet effective details to interior spaces, such as ceiling perimeters, doorways and skirting boards, amongst other applications. To create a unique profile for your project EZ Concept presents Custom Shadowline; made to meet your specific size requirements for the perfect fit in your design.

Shadowline Features

- Create the exact shadowline you need.
- Allow for variations in floor height or plaster thickness using a custom formed section.
- Heavy duty material to create a perfect straight and cleanline.

Custom size profile. Please specify sizes when ordering.

Custom Finishing Sections

Create Harmonious Finishes

The clean line and square set look can now be achieved throughout your complete project. Contact the team at Studco to assist you with creating a custom flush finish section to suit your needs. Here at Studco we can provide a whole finishing package that will enable you to deliver the flush finish look.

AluBase

Anodised Aluminium Skirting Board Trim

AluBase® Skirting board is a modern alternative to traditional timber skirting boards. Available in three different profiles (shadowline, shadowline rubber insert and skirting flat), AluBase is equipped to suit modern finishes and commercial office environments.

AluBase Shadowline Features

- One piece profile manufactured from high quality aluminium.
- Designed and approved for use with EzyJamb Classic Adjust (EZC) door jamb system only.
- Different profiles available to suit 10mm and 13mm plasterboard.
- Concealed fixing system.
- Crisp 12 x 12mm shadowline recess.
- Perforated bead for trowelled finish.
- Excellent resilience to wear and impact.
- Supplied in natural anodised finish.
- Perfect joins are easy with optional joiners.
- Eliminates cracking (common with MDF profiles and multiple sections, ie P50 with aluminium skirt)

Environmental Awareness

Our commitment to environmental responsibility Studco Greensmart is an industry-leading initiative based on two simple principles.

Sustainable building technology innovation; and Practical sustainability leadership.

We are great believers in environmentally responsible business practises and in genuine investment for developing products that save energy and protect the environment. Our commitment to environmental responsibility and corporate accountability is evident in our ongoing certification to the internationally recognised benchmark standard ISO14001:2004 Environmental Management System.

When you build with Studco products, you can earn Green Star points for Green Star certified buildings.

Earn Green Star points with EZ Concept®.

Architects and interior designers have a unique opportunity to use EzyJamb flush finish door jamb to achieve a modern square-set interior without compromising the Green Star credentials for the building.
