Other Como products available in Secure series access panel range include:

- Healthcare range of Anti-Microbial Ceiling tiles
- Tile Front Access panels

The Como Building Products **Healthcare Series of Access Panels** are specifically designed for use in a **controlled healthcare environment**. Designed and manufactured in Australia, the HC-Pressurised model is ideal for use in hospitals in areas required to have anti-microbial infection control technology and a pressurised seal between the frame and door to control positive or negative pressure.

Product description
